

ALWAYS ONE
STEP FORWARD

HAKKIMIZDA

Marinpros was established in December 2016 in Tuzla, the heart of Turkey's shipbuilding industry, by ITU Naval Architecture and Marine Engineer Buğra Eren Kaydızkurt. Since our inception, we have specialized in the repair, maintenance, and installation services of ship separators, offering high-quality services to both domestic and international clients. Our experienced team in all types of separators has become the preferred choice for many companies both at home and abroad. In addition to our separator services, we provide professional solutions in hydraulic systems and boutique projects, meeting our customers' needs in the best possible way.

OUR SPARE PART SERVICES

Second-hand original and OEM spare parts for all separators.

- Service kits
- IMO pumps and spares
- Hydraulic equipment
- Electronic control systems and boards
- Replaceable gaskets for plate heat exchangers
- Mechanical seals

OUR SECOND-HAND SEPARATOR SALES SERVICES

Our company, located in the Tuzla shipbuilding industry, provides second-hand separator sales and installation services. We offer separators with capacities ranging from 1,000 liters to 10,000 liters per hour in our stock, and these separators are used for oil, fuel, diesel oil, olive oil, and waste oil separation.

All separators in our inventory are shock-type separators, and we offer them either as complete units or as bare machines. All the separators we sell are delivered fully maintained, along with their manuals and dismantling/assembly tools.

We also provide mobile separator solutions. With our mobile unit, purification can be carried out wherever needed. This solution is primarily used for purifying the large oil tanks of ship hydraulic power units and the oil in hydraulic power units of factories.

SEPARATOR SPARE PARTS

Our company specializes in the supply and procurement of high-quality alternative spare parts from the Far East (Korea and Japan) and Europe. Through strong partnerships with leading manufacturers, we provide our customers with reliable and cost-effective solutions. Our extensive supply network and industry experience ensure that spare parts are sourced quickly and efficiently, meeting the highest standards.

RECON IMO PUMPS

We have stock of recon ranging from 1,000 liters per hour to 50,000 liters per hour, all serviced by us. Each pump is tested for a minimum of 5 hours with the liquid it will be used with and all given our valued customers with a guarantee.

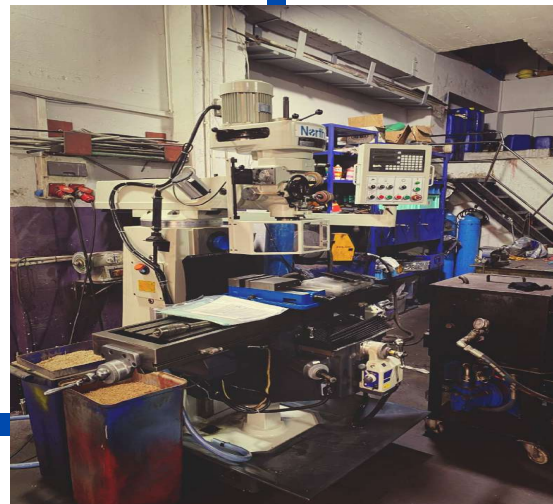

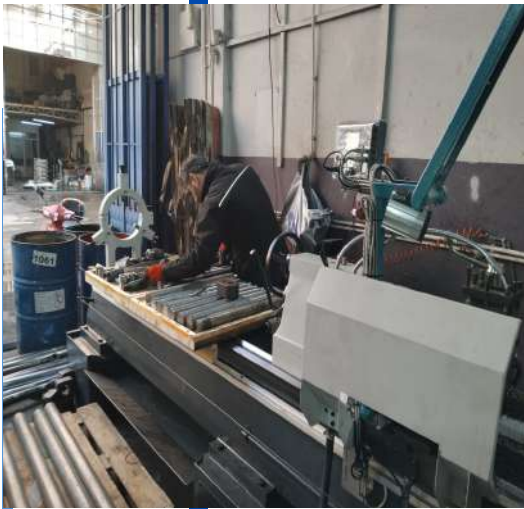

HIGH VIBRATION RUBBER BUFFERS

Our company manufactures special high-vibration-resistant mounts designed for use in separators and hydraulic motors. We produce 10 different types of buffers with research and development as well as design done in-house. These mounts are produced in our partner company's 500 m² manufacturing area, with quality control carried out by us.

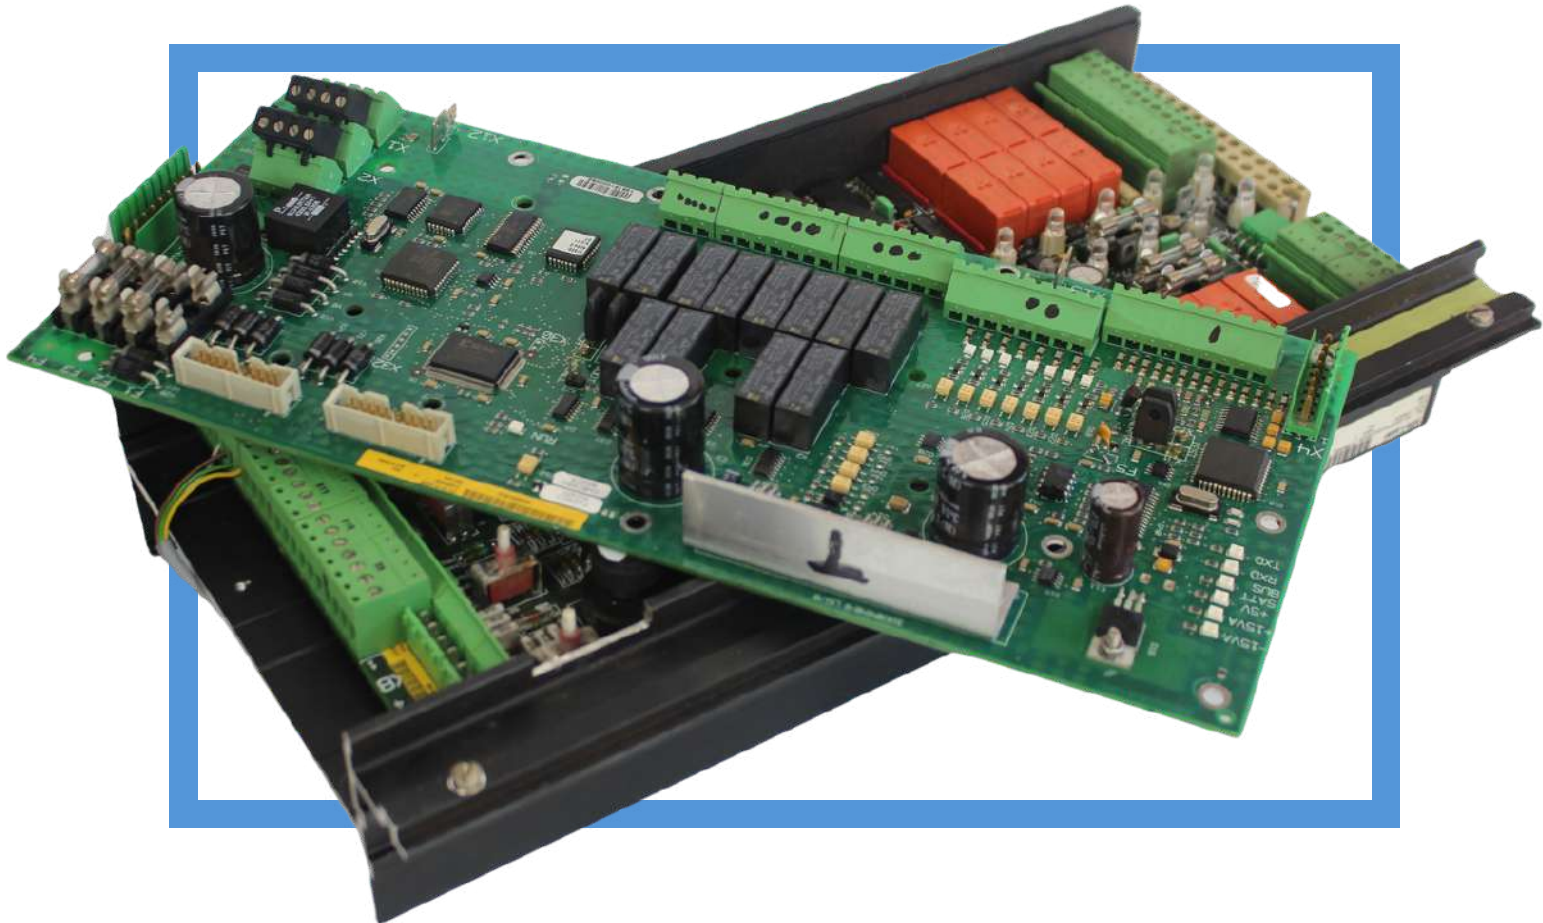

CUSTOM GEAR MANUFACTURING

High-speed resistant gears used in separators, pump gears, crane slewing gears, and worm gears are produced by our subcontractors after material analysis by our company. Our expert team is ready to provide support in gear solutions, making us a reliable partner for the most suitable and durable gears to meet your requirements

OUR CUSTOM MANUFACTURING SERVICES

With modern lathes and milling machines in our workshop, our experienced craftsmen carry out all types of boutique manufacturing with high quality and precision. By providing customized solutions tailored to our customers' specific needs, we strengthen our competitive position in the industry. We are here to bring your projects to life with the most suitable designs and manufacturing processes tailored to your needs. At Marinpros, we prioritize customer satisfaction and strive to deliver quality and reliable service at all times.

Electronic Control Systems & Boards

Our company provides professional repair services for Backflushing filter boards and separator boards. Additionally, we offer second-hand board sales to provide economical solutions for our customers. We also specialize in retrofit PLC installations & provide quick and efficient solutions with our proprietary "plug-and-play" systems. At Marinpros, we are here to serve you with reliable and practical solutions in electronic systems.

SEPARATOR MECHANICAL SPARE PARTS

OUR PRODUCT RANGE;

- SEPARATOR SPECIAL TOOLS
- PRESSURE SWITCHES
- PRESSURE TRANSMITTERS
- TEMPERATURE SENSORS
- SHAFTS
- GEARS
- 3 WAY VALVES
- FEED PUMPS

Both second-hand and new oem products are available in our product range.

OUR HYDRAULIC SERVICES

- We provide services for marine hydraulic systems
- Steering gear hydraulic systems
- Hatch cover hydraulic systems
- Hydraulic piston design and hydraulic cylinder
- Supply of hydraulic control valves
- Hydraulic crane fault diagnosis
- Crane inspection
- Hydraulic spare parts supply

Our 200 m² workshop, located in Tuzla Giptaş Industrial area ,at the heart of ship industry, removed from ships. Our experienced technicians carry out fault detection in the workshop, followed by the preparation of a comprehensive report. After completing the repair, maintenance, testing, and inspection processes, we present our separators to our customers along with a detailed report. With our quality-focused service approach, we always prioritize customer satisfaction.

OUR SERVICES

Ship Separator Repair: We offer fast and reliable service for the professional repair of ship separators of all brands and models. By prioritizing the continuity of our customers' operations, we complete repair processes in the shortest time possible.

Custom Manufactured Products: We aim to exceed our customers' expectations with custom-manufactured products designed and produced for the specific needs of the maritime industry. By providing flexible and customizable solutions, we bring your projects to life. At Marinpros, we always prioritize quality and customer satisfaction.

WHY CHOOSE MARINPROS

- High-Quality Original and OEM Spare Parts
- Fast and Reliable Delivery
- Technical Support and Consultancy Services
- Competitive Prices and Special Offers
- After-Sales Customer Service

EXTENSIVE STOCK AREA

In recent years, with our investments in the spare parts sector, we aim to provide better service to our valued customers through our 400 m² stock area established in the Tuzla region. This area includes overhauled separators, IMO pumps, and the inventory of spare parts we supply. We are pleased to support you in every way possible with all the opportunities our field of activity offers.
